

## Capstone for Web Design Course

### Hello!

Hope you had a good hands-on learning experience in your project in designing a business website using Weebly Platform. These projects would have given you a chance to build and apply your technical skills on Web Design. You are now ready to take on a challenge and solve an interesting problem using your Web Design skills.

### Problem Statement:

In the project, you had built a basic business website for a company that wants to sell the latest technology of 3D printers to individuals and organisations. You had provided many details related to the 3D printer on this website so that the customers feel confident to buy the product. However, the company now has extended their business to sell 3D printer filaments which will in turn boost their sale of 3D printers. To support this requirement, in this capstone, you will further enhance this website by creating a new page to sell the 3D printer filament. Create this page such that it highlights the following details of the 3D printer filament

- Multiple images of the filament
- Type of the filament
- Product Description
- Cost of the Product
- Provision to mention the Quantity required by the customer

### Submit your Capstone by following the steps below:

- 1) Click on this link to access the Onedrive location where you need to upload your solution files

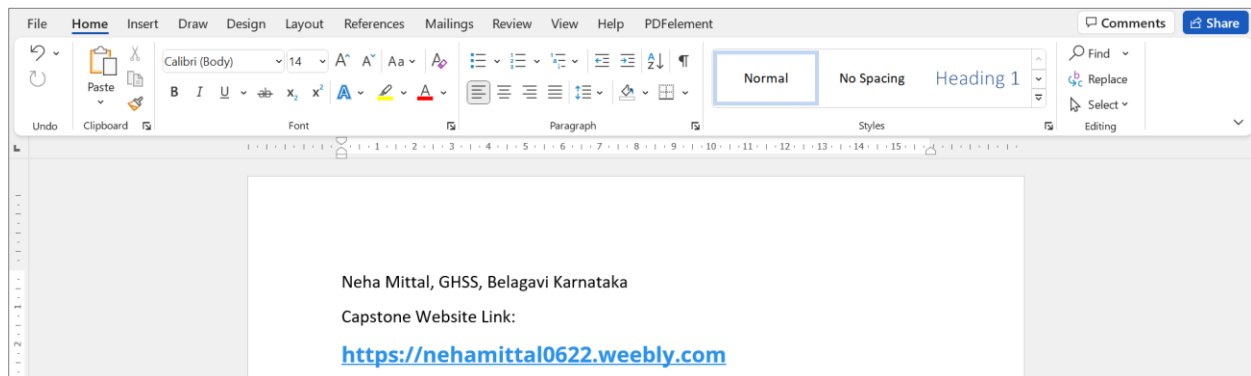

[Link to Web Design Capstone](#)

- 2) Create a folder with your full name followed by the school name, district name, state name as shown below

My files > Emerging Technologies Program FY22-23 > Student Capstone Submissions > Web Design Capstone			
 Name	Modified	Modified By	File size
 Neha Mittal_GHSS, Belagavi, Karnataka	A few seconds ago	Technology Innovation	0 items

- 3) Upload the word file that has the link to your published Website of the capstone as shown below

... > Student Capstone Submissions > Web Design Capstone > Neha Mittal_GHSS, Belagavi, Karnataka			
 Name	Modified	Modified By	File size
 Neha Mittal_Web Design_Capstone Website Link.docx	A few seconds ago	Technology Innovation	12.1 KB

### Prerequisite:

Ensure that you have gone through all the videos and completed the projects of the Web Design course on Planetcode.in portal. The course content will equip you to solve the problem given in this capstone. If you have not completed the course or would like to revise the content, please go to the platform <https://planetcode.in/> before you proceed.

### Platforms / Tools Needed:

Weebly Platform: <https://www.weebly.com/in>
